

WE ARE EXCITED TO ANNOUNCE THAT WE ARE MOVING!

Montgomery Pediatrics is moving to a new office down the road. Our new location will be **9157 Montgomery Road.**

This will be an upgrade for a number of reasons.

1. Two entrances to access the parking lot
2. Ample parking spaces with specific saved spaces for families with newborns
3. Our own entrance to the building
4. An established building with a completely renovated clinic space which is being built customized to our specifications
5. A large monument sign in the front of the building for easy visibility

Your doctors have had numerous meetings with the new landlord, architect, and builder to make sure this will be a clinic you and your family will enjoy visiting!

Help us welcome our new office manager! Stephanie Beckelhymer joined our MPI family in March and we are thrilled to have her here. Stephanie comes with over 20 years of clinical management experience. She is a mom to 4 beautiful children. Her positive attitude, enthusiasm, and energy are infectious and we know you will enjoy getting to know her too.

Be sure to say Hi and meet Stephanie the next time you are in the office!

We are welcoming a new doctor this summer! Christine Labowsky, MD will be retiring after a long and dedicated career to her patients. Cali Matheny, MD is joining our practice this summer and will be caring for Dr. Labowsky's patients.

Dr. Cali Matheny is a general pediatrician with a strong commitment to listening to her patients and additional training and experience in behavioral and mental health issues. She enjoys teaching and learning and will often have a medical resident working with her in the office. Because pronouncing Matheny can be challenging for young children, they are welcome to call her Dr. Cali.

Dr. Matheny is a native of New Mexico (and therefore thinks that green chile is the best decongestant). She earned her MD, and a PhD in neuroscience, at Washington University in St. Louis. She returned to the desert, mountains, and sunshine in Salt Lake City where she completed her pediatric residency and hiked every one of Utah's 5 National Parks.

Dr. Matheny and her husband moved to Cincinnati four years ago. They have a daughter who is currently completing her Master's Degree in Boston. Dr. Matheny enjoys strategy board games, good food, and children's and adolescent literature. She is always eager to hear what her patients are reading.

New Patient Offerings:

Walk in Hours: MPI is happy to offer walk in hours Monday mornings 8AM to 10AM to our patients. This service is designed to help quickly and conveniently address common illnesses that occur in childhood such as coughs, colds, earaches, and sore throats. We ask that your child be older than 4 months of age and have no chronic health problems (such as Asthma) when utilizing the walk in hours. In order to continue to provide excellent comprehensive health care, if you have health concerns that are more longstanding in nature or if there are multiple issues that need to be addressed we ask that you schedule a sick visit. This will allow us to dedicate the time needed to provide care to your child.

Baby 101

MPI is proud to offer "Baby 101", an informal one hour class led by our Pediatricians. This class covers what to expect in the hospital through the first few weeks with your newborn. There will also be time set aside to answer any questions you may have. The class is offered free of charge, however, we do request that you call and reserve your spot. The first class is scheduled for Thursday, May 18, 2017 at 5:30 pm. Thereafter, it will be offered the first Thursday of every month.
